point source loudspeakers

The 20M Ambient Sound Monitor

nothing images better

- **matched components**
- **magnetically shielded**
- **concentric, time coherent, point source, driver array**
- **first order minimalist crossover design**
- **elaborately braced acoustic suspension cabinet**
- **esoteric crossover components**
- **6.5 in cast magnesium frame poly woofer, 1 inch soft dome tweeter**
- **hex fasteners**

The 20M is a highperformance point source loudspeakers with spectacular soundstage performance. Its coincident source, magnetic shielding, and full range design make it well suited for the highest quality stereo, surround sound, and home theater systems.

MasterSource Audio is dedicated to producing time coherent, point source, first order, two-way loudspeakers. Research has shown that this design is one of the most appropriate designs for both contemporary multi-channel surround sound and stereo music systems.

MasterSource pushes the design and performance envelope by utilizing the latest innovations in driver and enclosure technology and by striving for zero tolerance

errors between the components used to make a pair of loudspeakers by matching all components. The goal is to produce loudspeakers that capture every nuance and convey the emotionalism and spiritualism of the performance.
